2. EVENT DETAILS –

The Faculty of Nursing, Sriganganagar College of Nursing, Tantia University, Sriganganagar, Rajasthan, organised a comprehensive “Kayakalp Activity (Sanitation and Hygiene)” under the theme “Kayakalp 2026: Clean Campus, Healthy Community.” The programme witnessed enthusiastic participation from approximately 450 students and faculty members, reflecting the institution’s commitment to cleanliness, hygiene, infection prevention, and environmental sustainability. The activity aimed to create awareness about the importance of maintaining a clean and hygienic campus, promoting healthy practices, preventing infections, and developing a sense of social responsibility among students and faculty members.

The programme also emphasised the significance of individual and collective efforts in creating a cleaner, healthier, and greener environment. The event commenced with an inauguration ceremony, followed by the Swachhata Pledge, during which participants pledged to maintain cleanliness, adopt hygienic practices, and contribute towards a healthy and sustainable society. A major highlight of the programme was the Kayakalp Awareness Rally, in which students and faculty members actively participated to spread the message of sanitation, hygiene, and environmental protection. Through awareness slogans and collective participation, the rally encouraged the campus community to adopt responsible cleanliness practices and extend these initiatives to the wider community.

The programme further included cleanliness and sanitation activities, promoting proper waste disposal, waste segregation, recycling, and the maintenance of a clean campus environment. Participants were encouraged to minimise waste generation and adopt environmentally responsible practices.

A dedicated session on hand hygiene and infection prevention highlighted the importance of proper handwashing techniques and the use of appropriate hygiene measures in reducing the transmission of infections. The session reinforced the vital role of nursing students and healthcare professionals in promoting infection control and patient safety in both healthcare settings and the community.
